- Electric raise/fall control of mixing head
- UL approved controls

### Optional Features

- Scraped surface or sweep agitators
- Electropolished
- Mixing tanks
- Mixer mounted on cart
- Vacuum systems

**ML MIXER**

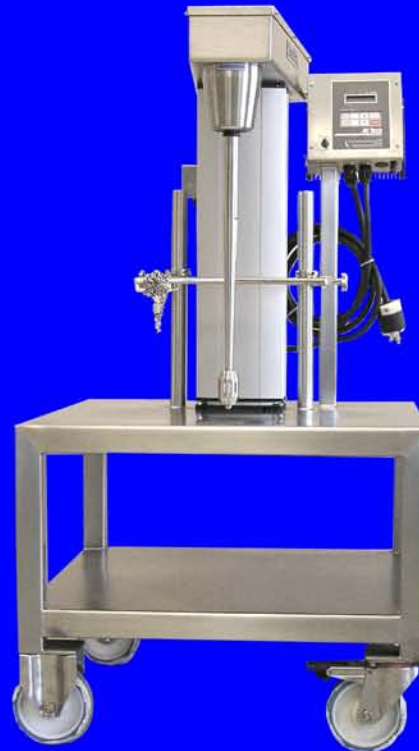

The Scott Turbon® Mixer lab models are the most versatile small process development mixers available.

Mixing jobs ranging from 1 pint to 5 USG are easily handled using the appropriate size Scott Lab Mixer. These mixers are designed to mix, blend, emulsify, homogenize, dissolve, disperse and de-agglomerate in a single step. This allows Scott Turbon to accurately scale-up time after time.

**LA-1 MIXER**

*Integration of mixers, tanks & controls are our specialty...*

<u>Model</u>	<u>Batch Size</u> (Volume)	<u>Height</u> (Down)	<u>Height</u> (Up)	<u>Depth</u>	<u>Weight</u>
XML	1 pt. - 1 gal.	19"	27"	23"	85 lbs.
ML	1/2 - 3 gal.	22 1/2"	34 3/4"	23"	90 lbs.
LA-1	1- 5 gal.	34"	53 3/8"	31"	185 lbs.

\*Volume may vary depending on product being mixed.

Scott Turbon® Mixer offers a wide variety of custom designed equipment to fit a customers specific requirement. We have the ability to engineer, machine and assemble custom mixing systems from lab scale through full production. Typical designs include vacuum vessels, specialty mixers, heating/cooling, portable units, powder feeds and weight systems.

Please contact us to discuss your standard and custom mixing applications.
